

Fork Positioner for Forklifts

Forklift Fork Positioner - A fork positioner is actually a device constructed out of top quality materials intended to withstand the most challenging operations and work environments. This particular piece of equipment can enable the one driving to be able to maneuver the blades hydraulically without leaving the seat. Side shifting units have the added ability to laterally position the entire load or the arms so as to facilitate more exact carrying and placement in a quicker and much more efficient way.

The unique fork pocket design enables operators to be able to securely swing the unit's forks without any fear of damaging the positioning cylinders. This allows the worker the alternative to either execute simultaneous or independent blade movement, depending on the job requirement. For most lift trucks with non-OEM carriages, complete carriages are needed. Standard OEM carriages could be converted into fork positioners on existing units.
